

Kisteleki M+M Introduces Innovative Camembert Stick at PLMA 2026

Kisteleki M+M Sajtgyártó Kft. is proud to present its latest product innovation at **PLMA 2026**: the **Camembert Stick**, a new and exciting cheese appetizer designed for modern consumers seeking premium snacking experiences.

The Camembert Stick is a breadcrumbed cheese stick that combines the rich, characteristic taste of **matured Camembert** with the smooth texture of **Kisteleki M+M's own developed melting cheese**. The result is a unique fusion that delivers a creamy interior and a **distinctive crunchy coating enriched with rice flakes**.

This innovative snack is ideal as an appetizer or finger food and pairs perfectly with a wide range of **sauces or fruit marmalades**, making it a versatile addition to both foodservice menus and retail assortments.

Visitors to **PLMA 2026** will have the opportunity to discover and taste the new Camembert Stick at **Hall 8, Stand 8.F.14**, where Kisteleki M+M will also showcase its popular core products, including **Mozzarella Sticks** and **Chili Cheese Nuggets**.

Buyers, distributors, and industry professionals are warmly invited to visit the stand and experience the latest innovation from Kisteleki M+M.
